Last session's topics

- **Semantics - definition and benefits**
- **Document Outline**
- **Semantic Elements**
  - **Nav**
  - **Article**
  - **Aside**
  - **Figure**
  - **Section**
  - **Main**
  - **Header**
  - **Footer**

"I'm sorry" and "my bad" mean the same thing...

Unless you are at a funeral.

Display: inline vs inline-block vs block (Stack Overflow question)
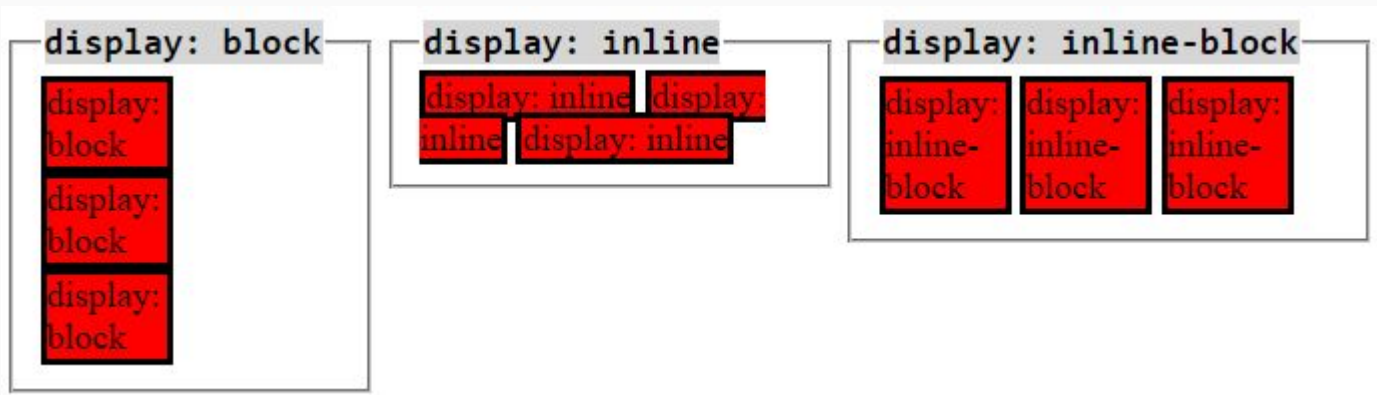

Inline

- respect left & right margins and padding, but **not** top & bottom
- **cannot** have a width and height set
- allow other elements to sit to their left and right

Block

- respect all of those
- force a line break after the block element

Inline-Block

- allow other elements to sit to their left and right
- respect top & bottom margins and padding
- respect height and width
